Data Logger

DMA-35n / DMA35 Digital Hydrometers Training Outline and Course Description

Course Description – DMA-35(n) Digital Hydrometer Training

This course provides the necessary lesson, familiarization and hands-on activities in order for the student to measure and record battery electrolyte specific gravity and temperature in the battery system. Additional instruction is provided to enable the student in proper transfer of acquired readings to the included data logger module and on to the Cellcorder.

Hydrometer Overview

- Kit components
- Basic operation
- Advanced operation
- Operation precautions and care

Data Logger

- Overview and Operation
- Battery type
- Downloading data from the hydrometer to the data logger
- Downloading data from the data logger to the Cellcorder
- Downloading data from the data logger to a PC
- Deleting data from the data logger

Note: This training module is included at no additional charge for customers who have purchased a DMA-35n or DMA-35 with a Cellcorder.
